SCIENTIFIC CLASS BOOKS.

LESSONS in ELEMENTARY PHYSIOLOGY. With numerous Illustrations. By T. H. HUXLEY, F.R.S., Professor of Natural History in the Royal School of Mines. Thirteenth Thousand. 18mo., cloth, 4s. 6d.

"It is a very small book, but pure gold throughout. There is not a waste sentence, or a superfluous word, and yet it is all clear as daylight. It exacts close attention from the reader, but the attention will be repaid by a real acquisition of knowledge. And though the book is small, it manages to touch on some of the very highest problems. . . The whole book shows how true it is that the most elementary instruction is best given by the highest masters in any science."—*Guardian*.

QUESTIONS on the same for SCHOOLS. By T. ALCOCK, M.D. 1s. 6d.

LESSONS in ELEMENTARY CHEMISTRY. Inorganic and Organic. By HENRY ROSCOE, F.R.S., Professor of Chemistry in Owens College, Manchester. With numerous Illustrations and Chromo-Litho of the Solar Spectra. Twenty-third Thousand. 18mo., cloth, 4s. 6d.

"A small, compact, carefully-elaborated, and well-arranged manual."—*Spectator*.

"It has no rival in its field, and it can scarcely fail to take its place as the text-book at all schools where chemistry is now studied."—*Chemical News*.

LESSONS in ELEMENTARY BOTANY. With nearly 200 Illustrations. By Professor OLIVER, F.R.S. Ninth Thousand. 18mo., cloth, 4s. 6d.

"To this system we now wish to direct the attention of teachers, feeling satisfied that by some such course alone can any substantial knowledge of plants be conveyed with certainty to young men educated as the mass of our medical students have been. We know of no work so well suited to direct the botanical pupil's efforts as that of Professor Oliver's, who, with views so practical, and with great knowledge too, can write so accurately and clearly."—*Natural History Review*.

ELEMENTARY LESSONS in ASTRONOMY. By J. NORMAN LOCKYER, F.R.S. With Coloured Diagram of the Spectra of the Sun, Stars, and Nebulae, and numerous Woodcuts. Fifth Thousand. 18mo., 5s. 6d.

"The book is full, clear, sound, and worthy of attention not only as a popular exposition, but as a scientific index."—*Athenaeum*.

"An admirable text-book. Those who do not know much of the science could not find a better and more accurate guide."—*Museum*.

QUESTIONS on the same for SCHOOLS. By J. FORBES ROBERTSON. 1s. 6d.

POPULAR ASTRONOMY. By G. B. AIRY, Astronomer Royal. With Illustrations. Sixth and Cheaper Edition. 18mo., cloth, 4s. 6d.

POLITICAL ECONOMY for BEGINNERS. By MILlicENT GARRETT FAWCETT. 18mo., 2s. 6d. [Recently published.]

CAMBRIDGE GREEK and LATIN TEXTS.

Carefully Printed from the Best Editions.

THIS series is intended to supply for the use of schools and students cheap and accurate editions of the Classics, which shall be superior in mechanical execution to the small German editions now current in this country, and more convenient in form. As the Editors have formed their texts from a careful examination of the best editions extant, it is believed that no texts better for general use can be found. The volumes are printed at the Cambridge University Press, and are issued neatly bound in cloth.
